

29 August 1985

25X1 MEMORANDUM FOR: [REDACTED]
Policy Branch/PPG

25X1 FROM: [REDACTED]
Chief, Security Education Group

SUBJECT: Minimum Standards for Community Security
Awareness Programs

Following are my thoughts on Subject:

°I recommend publication as a separate DCID in order to give the subject more priority and notice. As an annex it is subordinate to the DCID 1/14 and consequently does not have the impact. The issue deserves to stand alone.

°Should it be a separate DCID, it may be necessary to again review the revision to determine if there are elements of DCID 1/14 which may need to be restated in the new document.

°The issue of Supervisory Security responsibilities was opposed by the military members of the subcommittee. The consensus was that the Section on the "Individual's Responsibilities" would imply that supervisors have extra security duties. The group further concluded that such a statement would be too specific for a guidance document and would dilute the standards and the individuality of the various security programs.

°There was no problem on the part of the military with broadening the standards from SCI to classified intelligence information.

Should you wish to discuss please let me know.
